

# OCR640e Desktop

## Full-page Document Imager & eMRTD Reader

**Fast, accurate, reliable multi-illumination full-page desktop MRZ, RFID and 1D/2D barcode reader**

### Description

The OCR640e Desktop is a full-page multi-illumination ePassport reader. It captures ultraviolet and infrared images, as well as the full page of a passport in colour.

In a simultaneous single action the reader also decodes the machine readable zone (MRZ) and processes RFID data – including the holder's image – from the chip.

The OCR640e automatically detects when a document with machine readable data has been presented. Additionally, it is able to compensate for out-of-position MRZ data, so that the advanced recognition engine reliably provides highly accurate and very fast document reading capability, allowing large volumes of documents and smart cards to be processed quickly and efficiently.

The unit features blue, amber, green and red LED lights to keep the user informed of status from ready to scan, through to processing and successful scan; or to indicate that there is an issue with the document. The unit can also be programmed to provide audible feedback to confirm a successful read, signal premature removal of a document and flag a variety of data details.

The OCR640e has a compact, robust design and is designed for years of heavy-duty, frontline use.

### Applications

- Border control, Immigration and Law Enforcement
- Document and Visa Issuance
- Banking and Mobile Network Operators (KYC & AML)
- Gaming and Liquor stores (Age Verification)
- Tax Refunds and Money Exchange (Data Capture)
- Hotels, Airport and Car Rental Check-In

### Features

- Captures high-resolution images in multiple wavelengths – Visible, IR and UV
- Reads MRZ from ICAO 9303 compliant documents including Passports, e-Passports, ID cards and Visas as well as ISO 18013 compliant driving licences
- ISO 14443 contactless RFID reader/writer supports ICAO LDS standards including BAC, PA, AA, EAC and SAC
- Read 1D/2D barcodes from smartphones, tablets and paper-based documents.

*The OCR640e reads a variety of identity documents*
